BOTTOMS UP TOILET LIFT KIT

TV-300

Supplied with wax seals

- Raises your entire toilet by 3 1/2"
- Safer and more stable since you use a conventional toilet seat
- More sanitary and easier to clean than elevated toilet seats
- Universal design - works on round or elongated bowl toilets
- Supports users up to 500 lb (227 kg)
- Compliant with AODA and ADA as well as all building codes
- Patented award winning design

Conventional raised toilet seats that are fastened to the top of the toilet can be highly unstable if not fastened securely. They are also difficult to clean and can prove to be quite unsanitary.

BottomsUp® helps give you independence and restore your dignity. Family members benefit as well; no more separate bathrooms or having to take the raised toilet seat on or off.
